Environmentally Conscious, Customer Satisfaction Guaranteed!

From the Corner Post...

Mike Pietrzak
VP Sales & Marketing

Delgard premier aluminum ornamental fencing provides an elegant and stately accent to any project. Using rust-free aluminum for over 20 years, Delgard offers the traditional beauty of wrought-iron without the costly and time-consuming maintenance required of other fence systems.

Delgard fences are extruded with 50% recycled aluminum, painted, fabricated, assembled and packaged 100% in the USA. Many of our fences meet the ICC Pool Safety Code requirements and are produced in 5 grades: Residential, American Series, Aero, Commercial and Industrial. Our products are manufactured at our environmentally-friendly New Jersey campus, which boasts a landfill retrofitted with a gas-to-energy plant and two photovoltaic fields with over 5,100 solar panels. With a capacity to generate 3.8 megawatts of clean energy, Delgard is committed to investing in smart options for a greener planet.

Delgard fences are backed by a limited lifetime warranty against manufacturing defects and a paint finish that won't crack, chip or peel. Our complete line of easy cut and paste specifications are available online at CADdetails.com.
